## Single point of configuration and management

- **Web interface** where you deploy and manage
  - System
  - Devices
  - System and device software
  - Users
  - Permissions
  - Features
  - 3<sup>rd</sup> party services
- **No additional tools** needed

## Easy setup & deployment

-  Reduced setup time
-  Quicker onboarding
-  High System uptime
-  Easy troubleshooting

## Faster & better integrations

-  Reduced development time
-  Flexible integration choices
-  Enhance situational awareness
-  Gain actionable insights

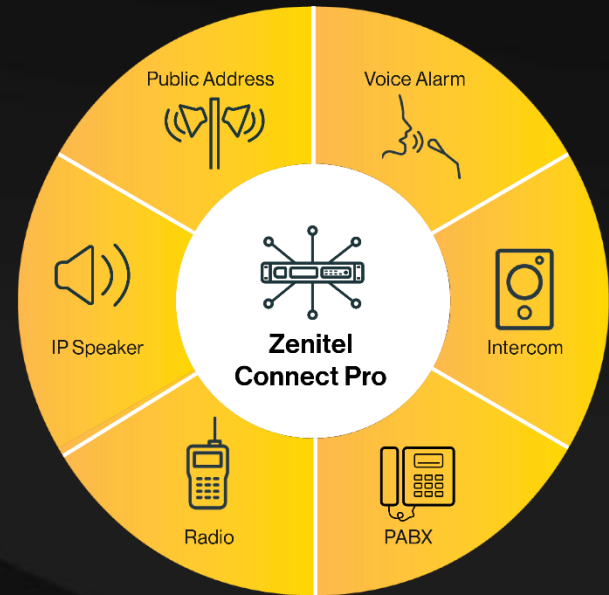

# Benefits

- Multiple **integration choices**
  - Can be integrated with numerous platforms , technologies and customer environments
  - Features can be customized to platform, customer requirements, and segments
- **Reduced development times**
  - Standardized interfaces and developer tools
  - Ready integrations with leading security platforms help define use cases and best practice
- The integration interfaces are **Cybersecure**
  - Authenticated and authorized interfaces

# Zenitel Connect Pro provides a unified solution

Zenitel Connect Pro unifies multiple disparate systems into a single unified critical communication solution

# Core features

2-way audio &  
video  
communication

Call queues with  
priority
