Efficacy Test Results

Independent Laboratory Testing Methodology

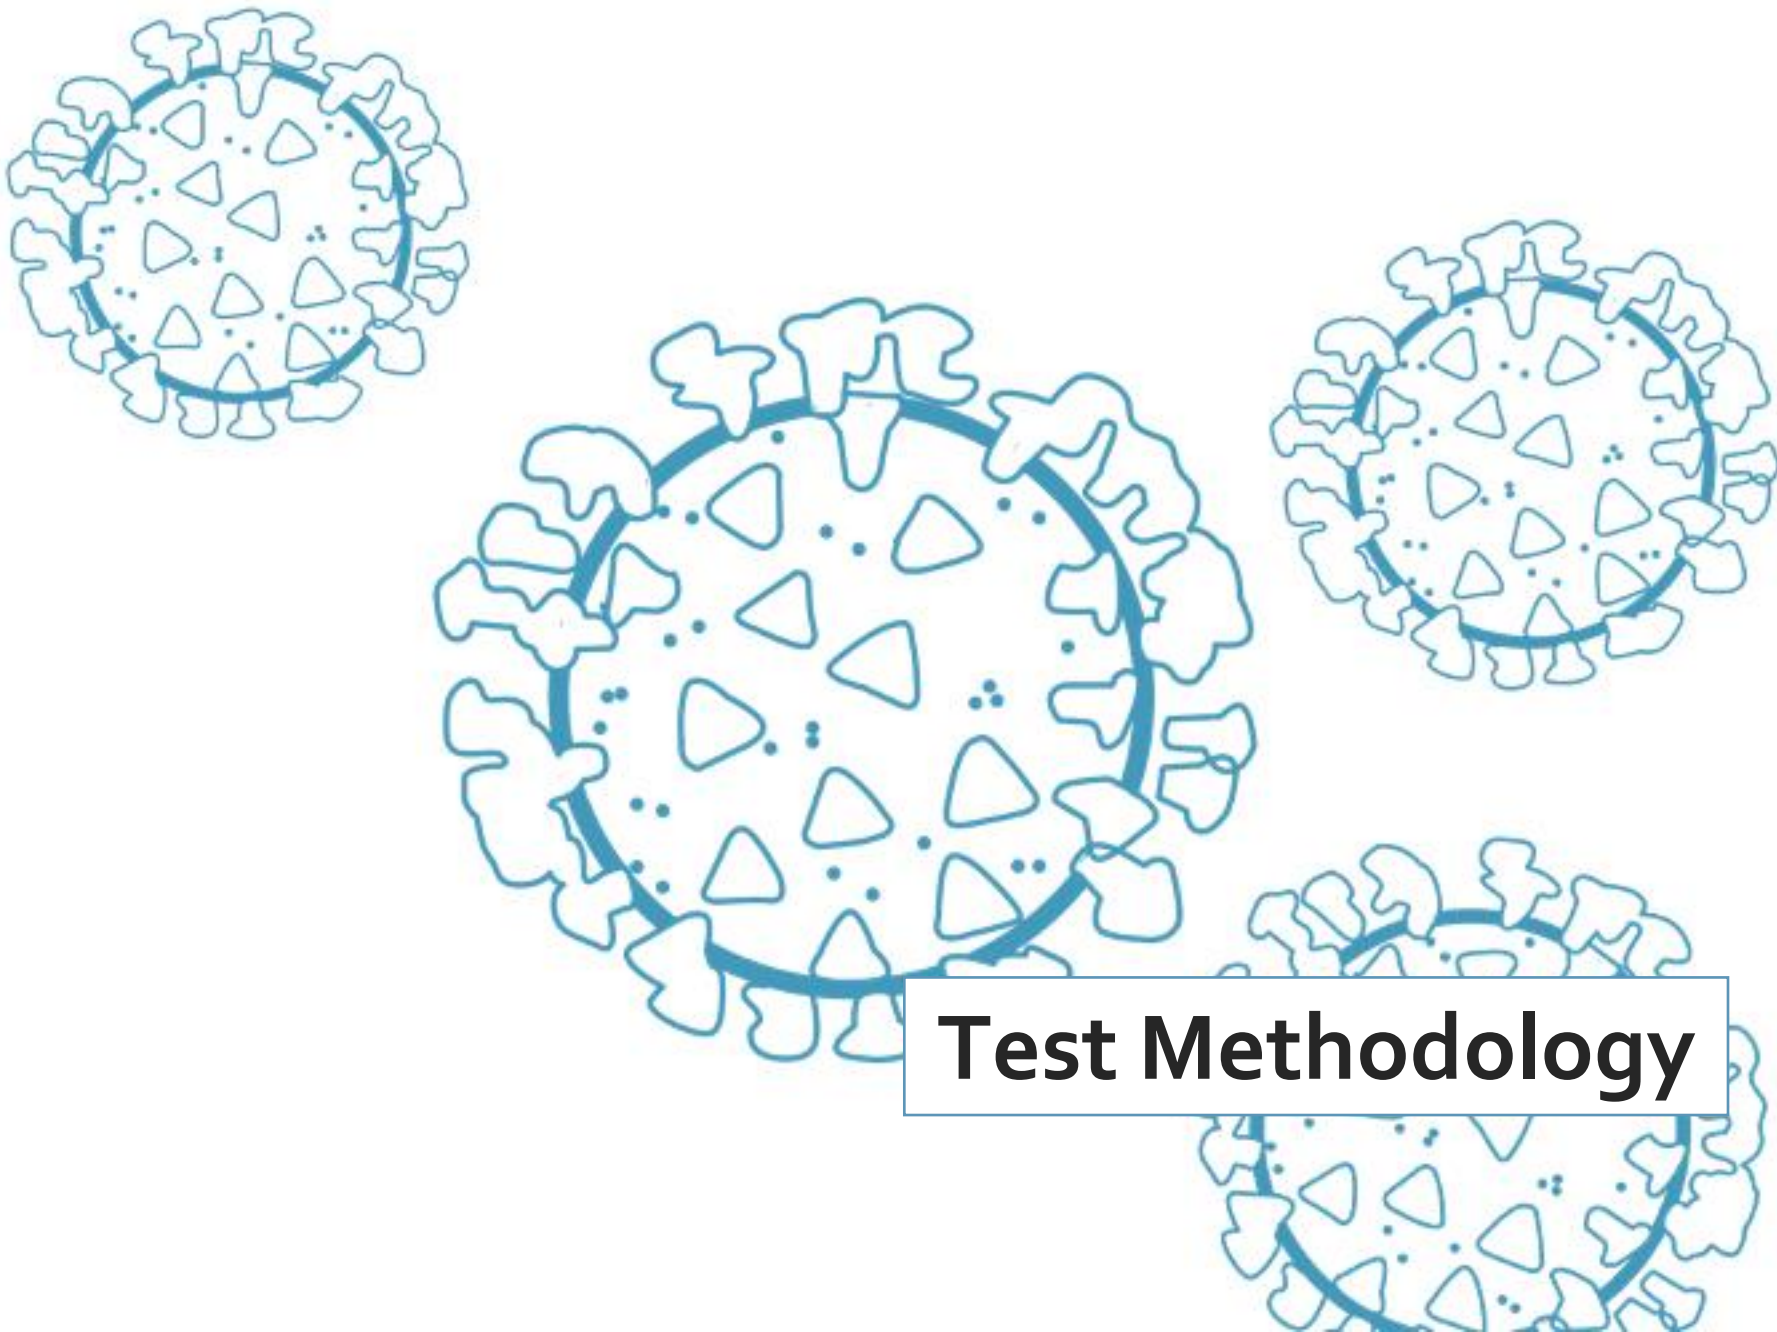

TEST METHOD: **ASTM International Method E1153 Modified for Devices** (*Test Method for Efficacy of Sanitizers Recommended for Inanimate Non-Food Contact Surfaces*)

Independent US Laboratory began conducting the ASTM E1153 test method in 2007. Since then, the laboratory has performed hundreds of ASTM E1153 tests on a broad array of test substances, against a myriad of bacterial and fungal species.

TEST DESIGN: **Double Replicate Design at prescribed doses** (*see chart on previous page*)
