

Reduce the Spread of Healthcare-Associated Infections (HAI)

Improve hand sanitization best practices by using clinically-proven effectiveness of UV-C light. The HANDY family of UV-C Sanitizing Solutions cleans hands and other small objects by killing microorganisms at the cellular level in seconds

- Kills all ESKAPE pathogens PLUS SARS-CoV-2, norovirus and C. Difficile
- Sanitizes hands, cell phones, eyeglasses, pens, etc.
- Sensors turn UV lamp on/off to deliver the correct dose
- 32 W power consumption; 10,000 hours of lamp life
- Digital dosing countdown timer
- Tabletop, wall-mountable, and free-standing options

**99.99% Sanitization Efficacy
in as little as 3 Seconds**

Wont give you more than necessary

**Now Proven to Kill
SARS-CoV-2!**

The Dirty Truth

- Hand hygiene compliance is <50% at most hospitals.¹
- Poor hand hygiene contributes to the spread of HAI's that affect 1 in 31 patients.²
- HAI's lead to extended patient length of stay between 8-11 days.³
- HAI's cost hospitals between \$28 - \$45 billion per year.⁴
